Web Application Development

Unit testing exercise

(no participation questions today!)

Unit testing exercise

Write end-to-end unit tests for the sio application:

- Add student: /sio/create-student (andrew_id, first_name, last_name)
- Add course: /sio/create-course (course_number, course_name, instructor)
- Registering student: /sio/register-student (andrew_id, course_number)
- Sending requests with invalid request parameters.

You should use the Django unit testing `Client`.

- See https://docs.djangoproject.com/en/2.1/topics/testing/ and its sub-pages for details.

Fix any bugs you find.
